

COVID-19 QUICK DEPLOYMENT BUNDLE

AeroScout® Links Temperature Monitoring

Cloud-based wireless monitoring

Challenges

As hospitals respond to the increased patient load resulting from the COVID-19 pandemic, there has been a surge in vital materials that must be stored within prescribed temperature ranges, including test kits, pharmaceuticals, and blood products. Storage conditions must be monitored continually to ensure patient safety and protect these valuable materials.

Solution

AeroScout® Links is a simple, affordable system for pharmacy, lab, clinic and hospital administrators to easily monitor and be alerted to patient safety-related environmental trends in real-time. The result is actionable information to meet regulatory compliance, prevent product loss, and improve staff efficiency and satisfaction. The AeroScout Links solution combines STANLEY Healthcare’s proven wireless sensor technology with a cloud database and mobile app to radically simplify your monitoring task.

How It Works

Setup of AeroScout Links couldn’t be simpler. No application servers, no network access to configure, and no third-party components to purchase.

IOT SENSORS
Field-proven, robust and reliable

MOBILE APP
Simple design, easy to use

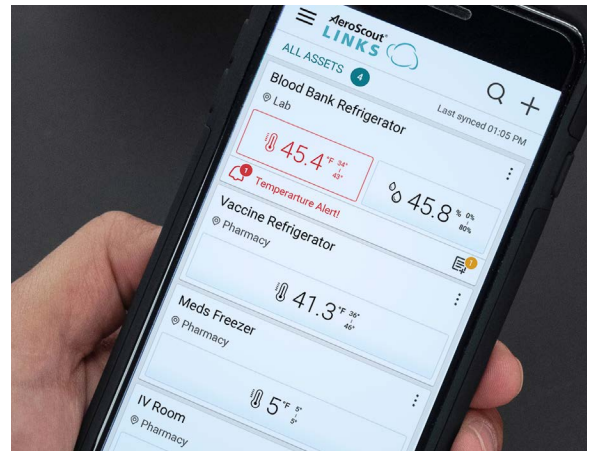

CLOUD
Always on, at lower cost

Benefits

- **Industry Proven, Field-Tested:** AeroScout Links' wireless sensors share the same proven technology as STANLEY Healthcare's AeroScout Environmental Monitoring solution. Monitor a range of temperatures as well as humidity.
- **Secure Infrastructure:** The AeroScout Links solution uses best-in-class cloud services for maximum data security. You don't have to worry about managing on-site infrastructure or run the risk of data loss.
- **Rapidly Deployed, Easy to Use:** Activate and configure AeroScout Links with the mobile app in a matter of minutes. The app also provides a single interface to receive and handle alerts, view sensor data in real time and pull historical reports.
- **NIST-Traceable Calibration:** Annual calibration of temperature monitoring tags to the standards of the National Institute of Standards and Technology (NIST) is an industry best practice. STANLEY Healthcare's ISO 17025 Accredited Environmental Monitoring Tag Calibration Program provides a simple and easy way to manage the process.
